Get Contoured with Dr Karen!

IS THERE A SMALL DEFECT IN YOUR SMILE THAT ALWAYS DRAWS YOUR EYE IN THE MIRROR?

A chip in a front tooth; some worn edges; shallow pits or grooves in the tooth enamel are all minor issues, but they do stand in the way of having a perfect smile.

If you suffer from one or more of these problems, even to the extent of a minor fracture or overlap, they all can be fixed using a procedure known as 'tooth contouring' 'reshaping' or 'dental bonding'. These teeth have been contoured and bonded. A harmonious smile is created in minutes. Using a polishing instrument, the dentist removes small amounts of surface enamel of one or more teeth to compensate for the imperfections. Followed up with a smoothing and polishing, this quick, painless, and inexpensive procedure can make a big difference in your smile. Because it is relatively inexpensive and non-invasive, it is a good place to start changing your smile to the one that you have always wanted, but Mother Nature failed to give you.

IF YOU HAVE A PERFECT SMILE, WHY NOT FLAUNT IT!

Dr Karen Gardner would like to invite you for a free check-up, where you can receive advice on all aspects of anti-ageing dentistry as well, to make your teeth and mouth healthier, look younger, and restore a vibrant confident smile. (In addition you can choose to receive advice on facial-rejuvenation, botox and fillers available to hold back the years.)

Article supplied by Dr Karen Gardner, of Clinica Dental La Plaza, Edificio La Plaza, next to Club de Tennis - Javea: Tel 966 461 120 for a free consultation, check-up and advice.
